

ARE YOU AN EXISTING SAP CUSTOMER
READY TO TAKE ON THE S/4 HANA JOURNEY?

SYD RAPID DEPLOYMENT S/4 HANA STARTER PACK

SAP S/4HANA is a real-time enterprise resource management suite for digital business. It is built on SAP's advanced in-memory platform, made simple with massive increased efficiency.

1 Why S/4 HANA?

It is all about simplicity. S/4 HANA is positioned as the digital core of the enterprise, aimed at simplifying processes, driving them in real time and making them easy to change to achieve new efficiencies. This is generated from the power of HANA, SAP's in-memory database technology. The speed of HANA changed the rules of the data processing and data storage game. Furthermore the simplified data model facilitates faster adoption and initial implementation, plus lower maintenance costs, without compromising the rich functionality of earlier versions in any way.
